A few years ago, I was told that I was considered "elite" by one of my relatives who was in politics. I had no idea what that meant until I spent some time in Europe, where they seemed to understand this concept better. ~~~ ryandrake That's the sort of argument you can get away with when you're on the left and "elites" are the problem. When you're on the right side of the political spectrum and "elites" are the problem, you get shouted down. Regulation of the superoxide-generating activity of the NADPH oxidase of granulocytes by small GTPases. The superoxide anion is formed by neutrophils and macrophages as a result of activation of phagocytic cell surface-located NADPH oxidase (Nox). In addition to regulation by phosphorylation, the activity of the oxidase is also modulated by small GTPases. In the present study we have investigated the role of Rac1, Cdc42 and Rho in the regulation of Nox-generated superoxide anions. The role of Rac1 and Cdc42 in the regulation of Nox activity was determined by measuring the superoxide generation in the presence or absence of cytosolic extracts prepared from human neutrophils. Rho was inactivated by deletion of the C-terminal SH3 domain (Rho(SH3)) or by
